Records Schedule Items

Sequence Number	
1	<p><b>Video Surveillance Recordings</b> Digital video files created from internal and external cameras, managed via a dedicated electronic Video Management System (VMS). The VMS operates 24 hours per day, 365 days per year, to facilitate monitoring of grounds and facilities; to document matters related to national security and legitimate law enforcement purposes (e.g. serious crimes); and to enhance law enforcement officer safety.</p>
1 1	<p><b>Input/Source Records</b> Disposition Authority Number      DAA-0087-2014-0001-0001</p> <p>Video source data captured from cameras in electronic format, and managed by the specially configured vendor software and equipment comprising the VMS. These input/source records generally contain uncalibrated and unvalidated digital data collected during observation in real time, and are buffered in the form of electronic files which are named, indexed, and organized according to a proprietary algorithm. When determined relevant by designated program officials, this raw data may be used to create digital master files of footage associated with a specific event, occurrence, or time period. By design, once this raw data reaches a certain age threshold, it will be automatically overwritten by newer data.</p> <p>Final Disposition                      Temporary</p> <p>Item Status                              Active</p> <p>Is this item media neutral?          No</p> <p>Explanation of limitation            These records are electronic only.</p> <p>Do any of the records covered by this item currently exist in electronic format(s) other than e-mail and word processing?      Yes</p> <p>Do any of the records covered by this item exist as structured electronic data?                      Yes</p> <p>GRS or Superseded Authority Citation      GRS 4.3, item 20 (DAA-GRS-2013-0001-0004) GRS 21, item 18 (N1-GRS-98-2)</p> <p><b>Disposition Instruction</b></p> <p>Cutoff Instruction                      Configure VMS to retain input/source data for 30 days.</p> <p>Retention Period                      Destroy immediately after 30 days by overwriting with new data.</p>
