Background Information

USCIS developed the Adoption Case Management System (ACMS), a web-based system, supporting the data entry, validation, verification and adjudication of both Hague and non-Hague adoptions. ACMS is a subsystem within the National Processing Workflow Repository (NPWR), a system which interfaces with a number of other electronic systems to facilitate adjudication of various form types, including but not limited to:

- National Appointment Scheduling System (NASS)
- Customer Profile Management System (CPMS)
- FBI Fingerprint Check
- TECS Name Check

USCIS uses the information contained in ACMS and provided by the petitioner, to determine the eligibility and suitability of the prospective adoptive parents and to determine the eligibility of the child to immigrate to the United States as an immediate relative. USCIS further uses ACMS to:

- Assign cases to an adjudicator
- Adjudicate cases
- Streamline the adjudication of applications and petitions and analyze workload trends for proper resource allocation
- Interface with NPWR to produce and store correspondence
- Interface with the Standard Management Analysis & Reporting Tool (SMART) to generate a number of statistical reports for workload analysis for properly allocating resources.

Information contained in ACMS is collected directly from Forms:

- I-600 Petition to Classify Orphan as an Immediate Relative
- I-600A Application for Advance Processing of Orphan Petition

- I-600/I-600A Supplement 1, Listing of Adult Member of the Household
- I-800 Petition to Classify Convention Adoptee as an Immediate Relative
- Supplement 1, Consent to Disclose Information
- I-800A Application for Determination of Suitability to Adopt a Child from a Convention Country
- I-800A Supplement 1, Listing of Adult Member of the Household
- I-800 A Supplement 2, Consent to Disclose Information
- I-800 A Supplement 3, Request for Action on Approved Form I-800A

USCIS may add additional adoption-related forms to this system at any time.

This schedule may cover future systems, including those with modified form names that serve a similar purpose.
