Background Information

The Electronic Travel Document (eTD) system provides ICE Enforcement and Removal Operations (ERO) and foreign consular officials with a web-enabled capability to coordinate electronic travel documents generated and submitted by the ERO Case Management Unit (CMU). eTD facilitates the creation, submission, and review of travel documents necessary to facilitate removal of aliens from the United States, as well as electronically certify the travel document or deny the request. ICE agents use eTD to compile travel document request packages comprised of supporting documentation for removal, consular users use the system to review and issue (or approve the issuance of) travel documents, and headquarters users use the system for reporting and context.
