Credential Identiguard System (CREDS)

The Credential Identiguard System is a commercial off-the-shelf (COTS) software workstation client and serves as the centralized repository for U.S. Immigration and Customs Enforcement (ICE) issued credentials. Credentials are recognized forms of identification, which describe the authority of the bearer and identify that individual's right to exercise specific authority for expressed official or legal purposes. The system directly supports the ICE Badge and Credential Program and is used to issue, monitor, validate and produce credentials to ICE agents, or other personnel designated by the Assistant Secretary, as evidence of their authority when having contact with the public and in dealings with Federal, state, local or foreign officials under purposes authorized by law, statute or ICE regulation.

The Office of Professional Responsibility (OPR) is responsible for the overall management of the ICE Badge and Credential Program, to include controlling access to the Credentials Identiguard System. Access to the system is limited to the Program Manager and designated Enrollment Team members.
