EMPLOYEE NOTIFICATION SYSTEM

Executive Office for U. S. Attorneys and United States Attorneys' offices

1. . **Organizational Context**

The position of United States Attorney was established by the Judiciary Act of 1789 (1 Stat. 73, § 35), and the mission of the United States Attorneys' Offices (USAOs) is to prosecute criminal offenses and litigate civil matters on behalf of the United States in all 94 Federal judicial districts nationwide. 28 U.S.C. § 547. By Attorney General Order No. 8-53 (April 6, 1953), the Executive Office for United States Attorneys (EOUSA) was created to "[p]rovide general executive assistance and supervision to the offices of the United States Attorneys." 28 C.F.R. §0 22

2. **System Description:**

The Executive Office for U.S. Attorney's (EOUSA) created a comprehensive enterprise-wide Employee Notification System (ENS) to notify United States Attorneys' offices and EOUSA employees and contractors of emergency and contingency situations. Notifications include alerts as well as management responses and expectations during affected periods. The system provides notifications via multiple means to the United States Attorneys' community.

The system supports alert initiation via the public telephone network and the Internet. The system can also transmit alert messages via conventional and mobile telephone, pagers, electronic mail, and Short Message Service (SMS) text. The system confirms notification delivery to personnel, and successively attempt delivery using all available methods until notification is confirmed.

The ENS system utilizes a commercial notification system to provide notifications.

3. **System Inputs**

All inputs to the ENS system come from EOUSA's Consolidated District Information System (CDIS). Each night, scripts pull data from the CDIS system into files. There is a file for each district, one for EOUSA, one for the Office of Legal Education (OLE), and one "all data" file. These files are securely transferred via SFTP protocol to the vendor's site. After all files are received, each file is processed, overwriting the current data set for each district. Individuals are told not to update data directly on the ENS system as updates are only kept until the next daily update is complete.

DISPOSITION: Temporary. Nightly updates delete outdated employee information.

4. **Master File:**

EMPLOYEE NOTIFICATION SYSTEM

Executive Office for U. S. Attorneys and United States Attorneys' offices

Each district has an input file. There ENS input files contains the following information for each record in the CDIS system:

Each input file contains:

First Name

Last Name

District

Home Phone Number

Private Cell Number

Government Cell Number

Government E-Mail

Private E-Mail

Branch

District

Title(s)

Employee Type

DISPOSITION: Temporary. Delete superseded data once successfully updated. Delete employee data when employee or contractor is no longer employed or occupying EOUSA facilities.

5. ~~System Outputs:~~

~~**Reports:** Activation Detail (by name or time), Activation Summary, Exception, Qualification, Qualification and Exception, Response Status, Scenario Personnel Status, and Group Report.~~

All contact data in ENS can be viewed and printed. All contact data can be reported, printed, and exported (via csv file).

DISPOSITION: Temporary. Destroy when business need ends.

6. ~~Documentation:~~

~~Documentation for the ENS comes in two forms. The first is from inside the system using the help screens. The second set is taken from the first, but tailored specifically to the specific organization's use of the system.~~

~~DISPOSITION: Temporary. Destroy when obsolete or replaced.~~
