LMSA RECORDS SCHEDULE No. 14

The Office of Construction Industry Services (OCIS), a component of the Labor-Management Services Administration, advised the Assistant Secretary in recommending operational policy, plans and programs in the areas of collective bargaining structure, wage and fringe benefits, Labor-Management issues and problems of national concern in the construction industry. In performing these functions, collective bargaining agreements from the construction industry were collected and statistical data compiled to provide information to the Assistant Secretary, the construction industry and to educators. This information is used by the construction industry as a guide to set working conditions, wages and benefits for future construction bargaining agreements. Educators use this data to indicate trends and to provide historical analysis of the construction industry. OCIS provided the most extensive source of this type of information.

The Office of Construction Industry Services was abolished on January 15, 1982. This schedule pertains to the disposition of construction bargaining agreements and related records housed in the OCIS National and Field Offices.
