<u>Bureau of Overseas Buildings Operations</u> <u>Information Resource Management System (IRMS)</u> <u>Records Disposition Schedule</u>

The Information Resource Management System (IRMS) supports OBO's oversight and management of its worldwide real property holdings. IRMS is an essential component of OBO's work processes. The Information Resource Management System (IRMS) consists of custom-developed software applications, as well as several commercial off the shelf (COTS) applications and an extranet used for collaborating with OBO's private sector business partners that support the Bureau of Overseas Buildings Operations core operations. Included in IRMS are custom software applications that generate allotment cables that distribute program funds to Department of State posts abroad, track requirements for maintaining and improving those posts Also included within the Information Resource Management System are COTS software applications that store digital photographs of overseas facilities, maintain documents related to projects to build new embassies overseas, and track tasks associated with work at OBO The COTS applications are integrated to varying degrees with the custom applications. Together, these applications comprise the core information systems that OBO relies on to manage its business. Information retained on IRMS is dated from 1998 to the present

1b.	Information Resource Management System (IRMS)
Description:	b. Master Data File: Contains data regarding funding for facility maintenance projects and requirements; real property leases; fund disbursements; project performance; repository of non-capital project information; tracking information regarding shipments of residential and office furniture and furnishings to posts; fire equipment installations, fire prevention and incidents at post; real property holdings including cost, size, occupants, features and address, as well as, other project information.
Disposition:	Temporary. Destroy 7 years after the property is no longer owned/leased or when no longer needed, whichever is later.
DispAuthNo:	
1c.	Information Resource Management System (IRMS)
