Digital Asset Management Systems

Digital Asset Management Systems

Note Modified per stakeholder review and with consent of USFWS records officer
April 2, 2009

U.S. Fish and Wildlife Service (USFWS) digital asset management systems (DAMS) used to ingest, annotate, catalog, store, and retrieve digital assets. These systems contain digital versions of USFWS assets, including materials and records such as public domain still photographs and line art, textual documents such as press releases and scientific reports, digital video files such as b-roll, public service announcements, and documentaries, and digital audio recordings such as interviews or wildlife sounds. These systems include electronic catalogs and repositories such as the USFWS Digital Library System, the National Conservation Training Center Conservation Library, and any other system maintained as a digital asset repository by the USFWS to make digital files available to the public or staff.

Records in the DAMS consist of:
1) the digital asset itself and associated metadata such as file size and format,
2) primary metadata (title, alternative title, creator, source, publisher, contributor, language, rights, audience, and subject(s),
3) description or abstract,
4) date created, available, issued, and/or modified,
and 5) USFWS records retention schedule item number and disposition instructions.

a) Database records

1) Metadata associated with digital assets scheduled as temporary records in the USFWS records retention schedule.

TEMPORARY Delete along with the digital asset from the digital asset management system after the retention period specified in the USFWS records retention schedule.

2) Metadata associated with digital assets scheduled as permanent records in the USFWS records retention schedule.

a) Metadata associated with digital assets in a NARA-approved format for the transfer of permanent digital records.

PERMANENT Transfer associated metadata along with digital asset to NARA in five-year blocks when the most recent record in the block has been in the DAMS for five years.

b) Metadata associated with digital assets not in a NARA-approved format for the transfer of permanent digital records.

Disposition not authorized. Retain associated metadata along with digital asset in the DAMS.

3) Metadata associated with digital assets that are records and unscheduled.

Disposition not authorized. Retain associated metadata and asset files in the DAMS.

4) Metadata associated with nonrecord digital assets.

TEMPORARY Destroy along with associated digital asset when superseded, updated, replaced, or no longer applicable.
