Wild Horse and Burro Program System (WHBPS)

Description of System:

The Wild Horse and Burro Program System was developed in 1984 to maintain information on specific animals captured and offered for adoption and on people who have adopted wild horses and burros. The system was expanded to include information on habitat areas where herds exist on public land, and on holding and preparation facilities where excess animals are marked, provided with veterinary care, and made available for adoption. The WHBPS enables BLM to implement the requirements of the Wild Free-Roaming Horse and Burro Act of 1971 (Public Law 92-195), as amended.

1.a. Master File. The system contains information on the care animals are receiving, any changes in location of the animals, and documentation about the passage of animal title to the adopter. It also provides data that allows assessment of the short-term and long-term effects on public lands where wild horses and burros graze.

Disposition: **PERMANENT**

Transfer a copy of the master file to the National Archives upon approval of this schedule, along with the technical documentation, in accordance with 36 CFR 1235.44-50. Thereafter, transfer a copy every 5 years, along with the current technical documentation.
