Management Information System/ Budget Management System (MIS/BPS)

Description of System. MIS provides a single electronic database containing standard and consistent data on payments made by the BLM's customers, the system can be used to prepare bills for the use of public lands and other goods and services that the BLM offers and also functions as a comprehensive "data warehouse" for financial and management data. This data provides Bureau employees with a centralized source for financial, budget, cost management, and workload measurement information. BPS is a sub-system of MIS used by the Bureau to perform a variety of functions in the budget planning process, including entering and prioritizing issues and projects, allocating funds received through the use of the Cost Target Worksheets, and the analysis of project success. Records are dated from 2003 – present.

a. Master File. The system provides data on budget, performance, cost management, collections and billings and workload measurement. Individuals, State and local governments, other Federal government agencies, and private-sector entities doing financial business.
