GRS/BLM Combined Records Schedules

## Schedule 18 - Security and Protective Services Records

### Introduction

This schedule incorporates security and protective services records described in General Records Schedule 18 and adds records of a similar nature that are unique to BLM.

BLM has authority for enforcement of all laws and regulations pertaining to the use, management, and development of public lands and resources under its jurisdiction. Security and protective services records include various files documenting efforts to control and protect information; to protect government land and facilities from unauthorized entry, sabotage, loss, pollution, and fire; to protect privately-owned facilities used by the government; and to determine loyalty and fitness of individuals employed by or seeking employment from the government; and to develop and implement plans for the protection of life and property under emergency conditions. Included are selected files of offices having Governmentwide or agencywide responsibility for security and protective services programs. Also included are files of security units, guard forces, and other organizational elements documenting the control of classified information, access to facilities, and like matters.

Records documenting certain administrative actions relating to security and protective services are authorized for disposal by GRS 18, Items 1-28. BLM additions to Schedule 18 are identified in this schedule following the GRS items. They include:

1. **Internal BLM Policies, Procedures, and Plans.** These are BLM-specific policies, procedures, and plans for security and protective services program that are not documented in a numbered directive.

2. **Law Enforcement.** The primary records of law enforcement originate with the special agents and rangers who conduct criminal investigations, apprehend violators, patrol public land areas, and prepare reports of those activities. The LAWNET electronic system supports the law enforcement program.

3. **Trespass.** Trespass activities involve investigation of reports of unauthorized use of or harm to lands, resources, or other property and the collection of compensation for any losses or injuries suffered as a result. Documentation of trespass investigations are contained in the trespass case files.

4. **Fire.** Fire management involves developing fire techniques and prevention methods and managing the fire suppression and fire use programs. Fire records in this schedule include reports, project packages, dispatch records, resource orders, review reports, and an electronic initial attack management system.

5. **Hazardous Materials.** Hazardous materials management activities include inventorying hazardous materials sites on public lands, investigating reports of incidents of suspected contamination, and documenting site clean up. Records in this schedule include incident reports, site files, and the public information repository and administrative records.

Any records created prior to January 1, 1921, must be offered to NARA for appraisal before an agency may apply these disposition instructions.

With the exception of item 5, all records described in this schedule are authorized for disposal in both hard copy and electronic forms, as provided in Schedule 20.

## Schedule 18 - Security and Protective Services Records

Item No.	Record Series Description	Disposition Authority
30	<p><b>d. LAWNET Data Base.</b> Electronic file that contains information concerning incidents of crime occurring on the public lands, including date, time, and location of the incident; the name, address, telephone number and description of any associated victims, witnesses, complaints, offenders, and arrestee; type of incident; quantity, description, and ownership of any affected property; description of any vehicles involved, action taken, disposition; and BLM officers involved in the incident. LAWNET will replace the field office activity feeder reports (item c(1)) and uniform crime reports. <b>Exclusions:</b> Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience (Schedule 23/21).</p> <p><b>(1) LAWNET Project History.</b> Record copies that document the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item d(2)). Consists of the concept of operations, official record designation documentation, quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants. <b>Location:</b> NIFC.</p> <p><b>(2) LAWNET System Documentation.</b> Record copies.</p> <p><b>(a) Documentation Necessary for Servicing and Interpreting the System.</b> Record copies of data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) necessary for servicing and interpreting the system. <b>Location:</b> NIFC.</p> <p><b>(b) Data Verification and Quality Control Files.</b> Record copies. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item d(1)). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. <b>Location:</b> NIFC.</p> <p><b>(3) LAWNET Software.</b> Application software necessary to use or maintain the master LAWNET System. The master copies of the software are maintained by the LAWNET system administrator at NIFC; user copies of software distributed to all BLM law enforcement officers. <b>Location:</b> NIFC and field offices with law enforcement officers: SO, DO, RA.</p> <p><b>(4) LAWNET Master Data File.</b> Magnetic masters created by copying to tape all data in the system when the data is migrated to a new system. <b>Location:</b> NIFC.</p>	<p>TEMPORARY. Cutoff EOFY in which the LAWNET data base is certified as an official agency records system. Transfer to FRC 5 years after cutoff. FRC destroys 25 years after cutoff. <b>UNSCHEDULED</b></p> <p>TEMPORARY. Destroy or delete upon authorized destruction of the master file (item d(4)). <b>UNSCHEDULED</b></p> <p>TEMPORARY. Cutoff EOFY in which documentation is created. Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. <b>UNSCHEDULED</b></p> <p>TEMPORARY. Delete when superseded by newer version or upon authorized destruction of the master file (d). <b>UNSCHEDULED</b></p> <p>TEMPORARY. Delete when LAWNET is replaced by and data transitioned into a new system and the new system is certified as an official agency records system. <b>UNSCHEDULED</b></p>
