18. Technical Assistance Program Papers. (NCI-70-80-4, item 198)

The Bureau cooperates with and assists several agencies including DOE, GSA and others responsible for the development and procurement of defense materials. Most of the papers are returned to the initiating agency, the Bureau keeping only copies of memoranda, reports, and other internal documents pertaining to the project, and correspondence with Government agencies, other than the initiating ones. The bulk of the work the Bureau does for these agencies consists of examining and appraising applications or proposals submitted by private industry involving tax amortization, a loan or technical assistance in developing a promising mineral source or for the improvement of a known source. The Bureau makes a field examination and makes an appraisal report, or furnishes technical assistance as requested.

Destroy when 10 years old.
