Schedule Subject Control Log Application - CLA is an accounting batch process tracking system. The system tracks the daily batch processes for the Office of Trust Funds Management (OTFM) and is used to ensure accurate and timely distribution of batches at every stage of processing. Reconciliation is performed twice daily between the Control Log Application (CLA) and the Trust Funds Accounting System (TFAS) to balance accounts and ensure the information entered is accurate. The Office of the Special Trustee for American Indians (OST) field offices and OTFM personnel will scan, fax, or upload documents into the system. Information is entered to identify the type of batch to be processed and is linked to account data. Information received from the field is in the form of work tickets, probate orders, collection documents, BIA-4285's, SF1081's, tribal documents, and correspondence on accounts. Input types are Word, Excel, and PDF documents; TFAS print screens, Treasury Standard forms, and other financial documents; and data entry. Data is arranged and accessed by date and batch number. The system produces a daily batch and the batches consist of various information types received from the field which are previously described as inputs into the system, and payment and account data produced by the system. CLA generates accounting managerial reports, Holdover reports, Fax logs, Productivity Metrics reports, Team/Branch/Individual reports, and EOD Reconciliation reports. The system contains records dated from June 1, 2015 to present. System software is Cold Fusion and MS SQL.

Internal agency concurrences will be provided No

Background Information This system is an Office of the Special Trustee for American Indians (OST) system under records group 0075.
