N1-075-03-5

Revised February 4, 2004

Land Records Information System (LRIS)

System Description: The Land Records Information System (LRIS), which functions as a centralized database, was designed in the early 1970s as the primary system that maintains the legal description of land held in trust for Tribes and Individual Indian owners. The data spans from 1973 to the present. LRIS is the system used to support the Federal responsibility to record, provide custody, and maintain records and information that affect titles to Indian lands, provide information to examine titles, and provide title status reports. LRIS maintains and reports information on land status, such as encumbrances, and legal ownership in accordance with Probate documents. LRIS also provides Bureau of Indian Affairs (BIA) Title Plants and Agency Realty Officers with instant access to current status information. LRIS is used bureau-wide with the exception of the Alaska Regional Office, the Eastern Oklahoma Regional Office, and the Eastern Regional Office.

LRIS resides on an IBM platform in Denver, Colorado and supported by the BIA OIRM Office in Reston, Virginia. LRIS was developed using software AG products as the front end for data entry and SAS products for storing current and historical records in a system 2000 database.

a. Inputs:

There are two categories of input source documents to LRIS: Title and Non-Title Documents. Title documents are documents that affect title to or encumbers Tribal and Individual Allotted lands, and that are required to be recorded by regulation and bureau policy.
