Fee-to-Trust (FTT)

System Description: The Fee-to-Trust (FTT) system was developed to track the process of land changing from a fee status to a trust status. FTT maintains information on purchase, usage and requirements for land changing status from privately owned to the land being held in trust by the United States Government. The Fee-to-Trust Electronic Checklist is a web-based application that stores information on the existing fee to trust checklist.

a. Inputs:

Inputs to the system are keyed in by users in a check list format listing the documentation required for fee-to-trust land transactions and acquisitions as well as additional information such as questions regarding the documents collected, the time that a question was answered and who is the official contact for each answered the question.

Disposition: Apply disposition instructions approved for paper and microfilm records.

b. Data Files:

The data contained with the system tracks dates, approval and mandatory requirements for land status changing from fee to trust. The primary key is system generated sequence number.

Disposition: PERMANENT. Create duplicate copy of records off-line and physically transfer to the National Archives upon approval of this schedule in accordance with NARA instructions and guidance. ~~Subsequent legal transfer of the records will be as jointly agreed to between DOI and NARA, in accordance with regulations currently cited in 36 CFR 1228.270.~~

c. Outputs:

Data output reports include: Report by Region, Report by Agency, Report by Land Area Code. Case file specific queries, sorts, reports, tables and related records and data compilation reports that are created for case files, studies, inquiries, inspections, and related program files.

Disposition: Apply disposition instructions approved for paper and microfilm program records.

d. Documentation

ELECTRONIC RECORDS SCHEDULE

System Data specifications, data dictionary, file specifications, code books, record layouts, FTT System Design document, FTT User Guide, output specifications, testing scenarios, final reports, regardless of medium, relating to the relational files or database.

Disposition: PERMANENT. Transfer to the National Archives with Relational Data Files identified in item b above.
