	<p><u>PROPOSED RETENTION SCHEDULE SUBMISSION FOR.</u></p> <p><u>BUCKET 4</u></p> <p>The Bureau of Safety and Environmental Enforcement (BSEE) is submitting the attached proposed retention schedules for review and appraisal. The design of each schedule is premised on a functional or "Big Bucket" format in lieu of the traditional organizational format for federal records retention scheduling.</p> <p>The disposition instructions have been developed in correlation with the BSEE lines of business functions and processes as they have been reported to the OMB and populated in the Department Enterprise Architecture Repository. The basic mission of the organization has remained the same. This schedule is written to authorize the disposition of the records in any media format (media neutral).</p> <p><u>Attachment 4: Proposed Functional Records Retention Schedule (a.k.a. "Big Buckets")- ENERGY AND MINERAL LEASES</u></p>		

Each bucket summarizes a unique mission-essential business function and its related processes. The buckets are divided into sub-buckets. The sub-buckets categorize separate lines of business that warrant a unique and dedicated set of disposition instructions for the records created, received, maintained, preserved or ultimately disposed of within the applicable line of business.

A crosswalk for each bucket is also submitted alongside with the actual bucket schedule.

The submission of the crosswalk for each bucket is for the purpose of providing a cross-reference between the existing NARA-approved MMS schedules - including item numbers, series descriptions and job numbers with the proposed sub-buckets and disposition instructions designated to supersede them.
