Background Information This schedule covers incident-activated non-surveillance audio/video recordings created by TIGTA personnel using cameras to include, but not limited to body-worn and mobile cameras during the course of their official duties. Recordings are the result of law enforcement related events that require on-duty law enforcement personnel to activate a camera such as a body-worn or a mobile camera recording device. The recordings result in the creation of an audio/video file. Audio/Video files may be determined to have evidentiary or non-evidentiary value.

The recorded data will result in two types of audio/video files: 1) audio/video files that have no evidentiary value; and 2) audio/ video files that have evidentiary value.

For use in this schedule, the following definitions apply:
 Non-Evidentiary- Audio/Video recorded by law enforcement personnel during the normal course of the performance of their duties determined to have no evidentiary value.

Evidentiary- Any recorded data that may have material or probative value, or may have bearing on any criminal, administrative, civil, or other legal proceeding. Audio/Video files determined to have evidentiary value shall be preserved under established rules of evidence with the associated case file.
