information system, which runs via Adobe Macromedia Coldfusion, and accessed using a web browser on any OIG network computer, including laptops using VPN access. It is a program designed to store and link documents, management functions, and house investigative data, summaries, and activities, which are managed and tracked as specific actions (e.g. investigations, preliminaries, bureau referrals, or general information files)

**A. Inputs:**

OIG-OI personnel physically enter the information in the electronic field blanks in Microsoft Access

**Disposition:** TEMPORARY Delete case information 15 years after case is closed or when no longer needed for administrative, investigative, legal, audit or other operational purposes

GRS 20, item Z

**B. System Data:**

In capturing all data and information pertaining to the allegations, many different fields on different input screens are available, depending on the direction/nature of how that allegation is to be handled. Generally, all allegations will capture a summary of the reported allegation(s), name and contact information for the Complainant, Subject(s), Witnesses, and Victim(s), investigative activities (if any), disposition information, administrative referrals and actions taken (if any), law enforcement activities (if any), judicial actions imposed (if any), and documents that run the spectrum from predicated documents, interview write-ups, culminating in final Reports of Investigation. IMIS covers all current and present cases which were generated this FY 2009, as well as all cases from all previous fiscal years which have been migrated from older systems. This includes open & closed investigations, inquiries, and referrals dating back to FY 2000.

**Disposition:** PERMANENT Transfer case data to NARA 15 years after case is closed

full and public use version of

**C. Outputs:**

Depending on hard-copy file needs, printouts of the case input screens or case activity/summary reports may be printed and placed in the official hard copy
