**International Passport Office Program (IPOP)**  
**IRM 1.15.26, New Item 44**

**Description:**

IPOP is used to monitor passports for IRS employees traveling to foreign countries.

**Background:**

*IPOP is a Microsoft Access application. International has the responsibility to provide passports for IRS employees traveling to foreign countries, and to obtain required visas for IRS employees. IPOP is an integrated Access database with a data entry form and a set of customized reports. System reports can be used in emergency/crisis situations to identify which employees are in countries of interest.*

*All information within the Form record is input manually by employees of the International Meeting, Travel, and Visitors Program Branch. IPOP administrators create accounts for IRS users authorized by agency management.*

*IPOP contains approximately five years' worth of data. Related travel request packages are maintained in hard copy and alphabetically arranged by employee's (traveler's) last name. The traveler and the traveler's office initiate the travel request package with the Office of the Director, International. A new travel request package is created for each foreign trip.*

**a. Inputs:**

Includes information obtained from the travel request package, which consists of a memorandum from the traveler requesting authorization for foreign travel and providing details of the trip, and a Form 1321 (Authorization for Official Travel). Information is also obtained from the traveler's passport.

1. **Travel Request Package.** Consists of the authorization memo, Form 1321, and attachments.

Disposition: Temporary. Cut off at close of fiscal year. Destroy 6 years, 3 months after cutoff.

2. **Passports.** Once passport applications have been processed, the passports for official travel are maintained by the International Travel Unit/CI until travel is required. Expired passports that are 15 years old are retired to the Passport Agency for disposal.

**b. Master files:**

Maintains data relevant to IRS employees traveling to foreign countries, including employee's name, DOB, address, and emergency contact information. Other data

includes passport number, issue and expiration dates, travel destination and business address, and security clearance information.

Disposition: Temporary. Cut off at close of fiscal year. Delete 6 years, 3 months after cutoff.

**c. Outputs:**

Electronic and paper reports generated on demand and including inquiries into the number of travel requests during a defined period, number of passports and visas requested and issued, and by/to whom, lists of IRS passports by number, and lists of international travelers in foreign countries.

Disposition: Temporary. Delete/destroy when superseded or no longer needed.

**d. System Documentation:**

Codebooks and user guide.

Disposition: Temporary. Delete/destroy when superseded or obsolete.
