...VE BLANK (NARA use only)

JOB NUMBER

**N1-058-09-**

**Background:**

*Secure Object Repository (SOR) is an application designed to support requests for sensitive tax-related information. It provides a method to return sensitive, tax-related information that cannot be sent using ordinary e-mail to registered users and IRS employees.*

*The e-Services project is an IRS Business Systems Modernization Office Project focused on revolutionizing the way taxpayers transact and communicate with the IRS. This Web-based project expands the existing third-party tools and data collection processes. The project creates and markets easy-to-use electronic products and services, which are intended for specific customer segments.*

*e-Services has several products designed to improve access to the IRS and the data necessary for the resolution of taxpayer account issues. One such product is the Transcript Delivery System (TDS). TDS allows an authorized practitioner to submit a request for certain types of transcripts electronically and receive them on-line via another preferred delivery method. Delivery methods include:*

*Online responses  
Bulk Information placed in a Secure Object Repository (SOR) or secure mailbox  
Facsimile  
Postal Mail*

*SOR Repository provides an end-user the ability to have TDS System deposit the letters and/or products in their SOR which functions as a secure mailbox that only that end-user can access. Thus, each end-user has a SOR where data is placed, or deposited. They access this data by clicking the "Mailbox" link found in the navigation tool bar towards the top of the e-services program. For most of the products delivered to the SOR, an e-mail is sent to the end-user alerting them data has been placed in their SOR. Depending on the type of data, and whether or not it has been Read or left Unread, the system will automatically delete the files. The system's data has short-termed usefulness and is considered obsolete after 45 days.*

IRM 1 15 29,  
Item 423

**Secure Object Repository (SOR)**

NEW

**Description:**

Secure Object Repository (SOR) provides a method to return sensitive, tax-related information that cannot be sent using ordinary e-mail to registered users and IRS employees. Secure Object Repository (SOR) is an application designed to support requests for sensitive tax-related information.

**A. Inputs:**

The Secure Object Repository (SOR) receives its information from the Qmail server located in the Enterprise Computing Center - Detroit. To access the SOR, the user clicks on the email link from the e-services main menu page after logging onto e-services. Links to any internal or external system, currently do not exist. Inputs to SOR include, but are not limited to Tax law

and procedural updates/changes, customer inquiry information, existing customer account data via eServices Registration, links to Power of Attorney (POA) information, and, internal IRS transcripts

*Disposition: Not Applicable Inputs to the system are appropriately scheduled under other published disposition authorities approved by the National Archives and Records Administration The official records reside and are managed in the original source systems.*

**B. System Data:**

Contents of a user's SOR includes reports the user requests, transcripts requested by the user, EAR responses sent by AM, TIN matching results, and error messages The contents have relatively short-lived usefulness

*Disposition TEMPORARY Delete/destroy when obsolete, or no longer needed for business functioning*

**C. Outputs:**

Outputs of the Secure Object Repository (SOR) include account specific information (including transcripts), eCatalogue order fulfillment, and trend information

*Disposition: TEMPORARY Destroy/Delete when no longer needed for business functioning Outputs generated to Taxpayer Accounts and Case Files are treated as original records and will be managed in the target paper files or case systems*

GRS  
20

**D. System Documentation:**

System Documentation for the Secure Object Repository (SOR) is stored in the DocIT Library This documentation includes, but is not limited to, Program, Technical, Operations & Maintenance and End-User Documentation

*Disposition TEMPORARY Delete/destroy when superseded or 5 years after the system is terminated, whichever is sooner*
