Item 10

Background.

The IRS Commissioner has a requirement to currently manage, coordinate, and track significant actions and high level inquiries and documents across the IRS Business Units. A COTS product, i-Trak, was procured to fulfill the requirement. The i-Trak system was upgraded to the e-Trak Web-based COTS product in September 2009. With the initial introduction into operational service, the e-Trak Software will include four application modules: Whistleblower, LATIS, GARNISH, and Correspondence. These modules are consolidations that replace existing independent IRS legacy software. The Public Law module within the LATIS application is used to track actions needed to be taken to implement the provisions of tax legislation that impact the IRS. It is used to capture the Public Law, Public Law Number, Law Title, as well as provisions, actions, and status related to specific legislation.
