# Background:

The Katrına Legislation permitted qualified individuals to calculate their earned income tax credit (EITC) and additional child tax credit (CTC) for Tax Year 2005 using their 2004 earned income amount The Prior Year Earned Income Option (PYEIO) application provided the ability for taxpayers to compute earned income tax credit (EITC) and additional child tax credit (CTC) for Tax Year 2005 by providing the earned income dollar amount claimed in 2004 Taxpayers accessed the PYEIO application by navigating from links on the IRS home page, http://www.irs.gov The PYEIO application authenticated user input "shared secrets," (Taxpayer Identification Number (TIN) and Date of Birth (DOB)) and account eligibility before any account information was disclosed or further use of the application was allowed Eligibility for the calculation was determined by the zip code of the address of record being in the defined disaster areas or by the account being previously identified as an account of a disaster victim by normal IRS procedures PYEIO was retired at the end of the 2005 Processing Year (January, 2006)

IRM 1 15 18, Item 63

# Prior Year Earned Income Option (PYEIO) System

# Description:

Legislation passed by Congress in the aftermath of Hurricanes Katrina and Rita permitted qualified individuals to calculate their earned income tax credit (EITC) and additional child tax credit (CTC) for Tax Year 2005 using their 2004 earned income amount. The Prior Year Earned Income Option (PYEIO) application provided the ability for taxpayers to compute earned income tax credit (EITC) and additional child tax credit (CTC) for Tax Year 2005 by using the earned income dollar amount claimed in 2004. PYEIO was retired in January, 2006.

\*Note – At the time of this publication all records related to Hurricane Katrina and Hurricane Rita are under a legal hold which precludes their destruction. Before implementing this schedule, Systems Owners should check with either General Counsel or the Servicewide Records and Information Program regarding the status of the Hurricane Katrina Records Freeze.

### A. Inputs:

Inputs to the Prior Year Earned Income Option (PYEIO) System were manual. This information was provided by the Integrated Data Retrieval System (IDRS) Central Files On-Line (CFOL) through the Customer Communications Interactive Processor (CCIP) interface. This application extracted the TIN, File Source, Tin Type, DOB of Primary Taxpayer and the Earned Income Amount for 2004 from the Customer Communications Interactive Processor (CCIP)

By matching the Taxpayer entered TIN and DOB of an account which has been identified as a disaster victim account, CCIP received its corresponding data from Corporate Files On Line (IDRS CFOL) using Command Codes SCAP IRTF (Standard CFOL Access Protocol Individual Return Transaction File) and SCAP IMF (Standard CFOL Individual Return Transaction File)
