VE BLANK (NARA use only)
JOB NUMBER

N1-058-09-

Background:

The ID Card Media Issuance System (ICMIS) is a Legacy system It is a combination of proprietary vendor hardware and other various vendor ESS software that is deployed nationwide ICMIS performs 2 functions the creation of IRS identification cards and the control of physical access to IRS facilities One of the components is the IVIS Plus System 1000 (IVIS) With few exceptions, the software/hardware that is used to create IRS identification cards is separate and distinct from the systems that control physical access

The Identity Verification Information is a Commercial off the Shelf (COTS) software workstation client and falls under the Agency-Wide Shared Services (AWSS) division of IRS The AWSS develops procedures and implements policy for the IRS's internal real estate and facilities management, physical security (of which this system is a part), EEO and Diversity, personnel, procurement and customer support activities The product is developed by Identocard Inc and used to create Agency Identification Cards and Pocket Commissions IVIS is deployed nationwide at designated sites in standalone MS Access Databases It does not interface with any IRS systems.

****Note:** The Director, AWSS Physical Security and Emergency Preparedness, is taking action to standardize the ICMIS systems through a series of acquisitions and a re-fresh initiatives beginning in 2008 IVIS is scheduled to be replaced in FY 2011 and will be obsolete after full re-fresh

Identity Verification Information System (IVIS) Plus System 1000
