Schedule Number: N1-058-10-002

Some items in this schedule are either obsolete or have been superseded by new NARA approved records schedules. This information is accurate as of: 6/30/2021

ACTIVE ITEMS
These items, unless subsequently superseded, may be used by the agency to disposition records. It is the responsibility of the user to verify the items are still active.

Item B1, System Data
Item D, System Documentation

SUPERSEDED AND OBSOLETE ITEMS
The remaining items on this schedule may no longer be used to disposition records. They are superseded, obsolete, filing instructions, non-records, or were lined off and not approved at the time of scheduling. References to more recent schedules are provided below as a courtesy. Some items listed here may have been previously annotated on the schedule itself.

DAA-0058-2015-0004-0001 supersedes item 1B2.

IRM 1.15.24, New Item 91
Employee Plan and Exempt Organizations Returns
Inventory Control System (ERICS) Historical Archive

Background:

ERICS was an inventory control system that maintained the databases containing the examination inventory of three business units within TE/GE including Employee Plans (EP), Exempt Organization (EO), and Government Entities (GE). Specifically, the ERICS application housed the database tables for two sub-applications used by TE/GE employees. These applications consisted of the Employee Plans Inventory Control System (EPIC) and the Exempt Organizations Inventory Control System (EOIC). These systems were designed to enable group managers to use automated tools in the management and control of group inventory.

The taxpayer and employee data fields were used to track exam case inventories in real time by group and agent. Taxpayer data fields provided tools for tracking cases within the group by age, return types, plan numbers, and geographical location. User screens were provided that could generate listings of cases by agent by age and/or project code, transmittal forms when physically transferring cases to another IRS office, entries to close cases or open new cases on the system. Employee data fields could further divide the case tracking above by agent name and/or grade and the agent's post-of-duty (POD), thus allowing more detailed inventory tracking reports.

User access depended upon permissions and roles as approved by the user's manager. Depending on the user and the role(s) assigned to the user, the system menu provided different system capabilities.

This application will be retired as of 10/1/2009. Functionality of the application has been replaced by the Reporting Compliance Case Management Systems (RCCMS) formerly known as TE/GE Reporting and Electronic Examination System (TREES). Although TREES was originally released in 2007, TE/GE ran dual systems until this year. As of 10/01/2009, four ASCII files will be created to store historical ERICS data as a backup/reference. Two files will contain data regarding all closed cases (one for EP and one for EO/GE), and the other two files will contain data on all open cases as of the
Description:

ERICS was an inventory control system that contained the examination inventory and related information of three business units within TE/GE including Employee Plans (EP), Exempt Organization (EO), and Government Entities (GE). This application will be retired as of 10/1/2009. Functionality of the application has been replaced by the Reporting Compliance Case Management Systems (RCCMS), formerly known as TE/GE Reporting and Electronic Examination System (TREES).

a. Inputs:

1. Inputs included taxpayer return data electronically received from RICS (Returns Inventory and Classification System), and employee data from the IRS Discovery Directory. Also included direct manual entry of case/employee information.

Disposition: Not applicable. Recordkeeping copies of RICS and human resource data are appropriately scheduled under other authorities.

b. Master Files/System Data:

The ERICS application maintained database tables for two sub-applications used by TE/GE employees. These applications consisted of the Employee Plans Inventory Control System (EPIC) and the Exempt Organizations Inventory Control System (EOIC). EPIC was an inventory control system containing employee plans examination cases. EOIC was an inventory control system containing exempt organizations examination cases.

Upon ERICS shutdown, four ASCII files will be created to store historical/archived ERICS data. Two files will contain recordkeeping data of all closed cases (one for EP and one for EO/GE), and the other two files will contain
data on all open cases as of the date of retirement (again, one for EP and one for EO/GE). Closed case information in ERICS is not duplicated in RCCMS. Open case information in ERICS was downloaded to RCCMS in 2007 (then TREES). The business unit has been running dual systems since that time. The ASCII files for open cases constitute backup/reference materials.

For each case, taxpayer data includes name, TIN (Taxpayer Identification Number), MFT (Master File Transaction) code, plan number, tax period, status code, and open/closed dates. Agent information includes agent group number.

1. Closed Case Data.

**Disposition:** Temporary. Consists of two ASCII files of archived ERICS data, one for EP and one for EO/GE. Affect a one-time purge of both files when 7 years old.

2. Open Case Data.

**Disposition:** Temporary. Consists of two ASCII files of archived ERICS data, one for EP and one for EO/GE. Affect a one-time purge of both files when 7 years old.

3. Outputs:

1. Screens within ERICS could be used to query and run reports. Users could extract specific case data, generate Form 3210 case transmittal forms, or request set summary reports. The Form 3210 was produced by the system to move the closed/transferred inventory out of the group. Inventory summary reports and other ad hoc reports were possible by entering certain criteria such as month/year, group/area. Management reports included case aging reports, inventory validations, statute logs, Forms 3210, and agent listings.

**Disposition:** Temporary. Destroy/Delete when no longer needed for administrative, audit, legal, or other operational purposes.

2. Forms 895 *Notice of Statute Expiration.* This form is used by exam functions to provide information, notification and statute update approval for statute of limitations for tax returns.
**Disposition:** Not applicable. Recordkeeping copies of these forms are filed with/disposed of in accordance with associated case files.

d. System Documentation:

Includes User Guides for both EP Inventory Control and EO Inventory Control.

**Disposition:** Temporary. Destroy/Delete when superseded or 5 years after the system is terminated, whichever is sooner.
