Background:

International National Standard Application (INTL NSA) is an application that captures tax information related to foreign individuals and entities (e.g., foreign partnerships, corporations, etc.). The tax withholdings are reported on various tax international returns prepared by, or for those foreigners, or foreign entities, and then submitted to the IRS. There are four modules/subsystems which facilitate the capturing of this data, and they are Project 1446 NSA 36, Foreign Investment Real Property Tax Act (FIRPTA) NSA 37, Elections NSA 40, and Form 8233.

INTL NSA (FIRPTA, Elections, Project 1446, 8233) is designed to collect relevant data to the processing of Forms 8288-A, 8805, 8288-B, 8233 and 897(i) Elections. This data is used in corresponding with taxpayers, researching for up-front credit verification, and transmitting data records to the Compliance Data Warehouse (CDW), the Office of Statistics of Income (SOI), and the Enterprise Computing Center in Martinsburg (ECC-MTB) for upload to the Information Returns Master File (IRMF). Employee data is maintained strictly for the purposes of identification and authentication.

International National Standard Application Database (INTL NSA)

Description:

International National Standard Application (INTL NSA) is an application that captures tax information related to foreign individuals and entities (e.g., foreign partnerships, corporations, etc.). The tax withholdings are reported on various tax international returns prepared by or for those foreigners or foreign entities, and then submitted to the IRS.

Inputs:

Inputs to the International National Standard Application Database (INTL NSA) are Forms 8288-A, 8805, 8288-B, 8233 and 897(i) Elections extracted from both paper and electronically submitted forms.

1. Paper and electronically submitted Forms 897 (1) Elections, 8288-A, 8288-B, 8233, and 8805

Disposition TEMPORARY Follow disposition and retention instructions for individual forms listed in Records Control Schedules 26, 28, and 29.

2. Electronic Batch Files

Disposition TEMPORARY Delete/destroy cache file after successful entry and verification into the system.
### B. Outputs.

The International National Standard Application Database (INTL NSA) is used to generate letters for use with the IR Form 8288-B, 8233, and 897(i) Election processes. Additionally, electronic data captured in the INTL NSA from the IR Forms 8288-A and 8805 is transferred to the Enterprise Computing Center – Martinsburg (ECC-MTB) for upload to the Information Returns Master Files (IRMF).

Disposition Not Applicable  No additional copies of the output data files are maintained.

### C. System Data.

The International National Standard Application Database (INTL NSA) is designed to collect relevant data to the processing of Forms 8288-A, 8805, 8288-B, 8233 and 897(i) Elections. This data is used in corresponding with taxpayers, researching for up-front credit verification, and transmitting data records to the Compliance Data Warehouse (CDW), the office of Statistics of Income (SOI), and the Enterprise Computing Center in Martinsburg (ECC-MTB) for upload to the Information Returns Master File (IRMF).

Disposition TEMPORARY  Destroy electronic data 7 years after year of processing.

### D. System Audit Data

Disposition TEMPORARY  Delete/destroy Audit Logs 7 years after the end of the processing year.

### E. System Documentation.

Disposition TEMPORARY  Delete/destroy when superseded or 5 years after the application is terminated, whichever is sooner.
