Cash Accounting and Reporting Directorate
Cash Forecasting Division

The Cash Forecasting Division (CFD) provides decision support to the Office of the Fiscal Assistant Secretary (OFAS) with forecasting, monitoring, and managing the cash and debt position of the Treasury for the purposes of maintaining a target balance in the Treasury’s operating cash balances and maximizing interest earned on the Treasury Tax and Loan Accounts (TT&Ls). Much of this information is used in the process of compiling and producing the Daily Treasury Statements, which reflects this data.

The Division develops and manages all requirements for reporting critical cash and debt management financial information. It prepares and issues updates as necessary and serves as a major contact point with the Federal Reserve System. In this contact process, the Division interacts with the Federal Reserve Open Markets Desk, the Federal Reserve Board of Governors, and the individual Federal Reserve banks on matters impacting the bank reserve accounts.

The Division supports the forecast, tracking, and management for the projected cash and debt position. It collects, analyzes, and summarizes critical cash and debt management data. It also participates in the daily conference call to determine the cash position requirements while at the same time providing tax receipt data to the Bureau of the Public Debt (BPD). CFD develops CASH TRACK initiatives and maintains CASH TRACK data.

1. **CASH TRACK.** This automated system supports FMS and the Office of the Fiscal Assistant Secretary in the maintenance of desirable cash balances in Treasury accounts with the Federal Reserve Banks, and in preparation of the Daily Treasury Statement (DTS). CASH TRACK assists in gathering information concerning Government expenditures and receipts and provides automated analysis to assist the Treasury in maintaining the appropriate level of funds in the Treasury's General Account (TGA) and Treasury Tax & Loan (TT&L) accounts.

   The system documents the operating cash balance of the Treasury including the daily closing balance and operating balances for each day, the month to date and the fiscal year to date. Also documented are deposits and withdrawals of operating cash, public debt transactions, adjustments to public debt transactions to cash basis, debt subject to limit Federal tax deposits, tax and loan note accounts by depositary category, and income tax refunds issued. The data for these are shown daily and also include data on the month and fiscal year to date.
