37. ORACLE Fixed Asset System

The ORACLE Fixed Asset System is database software that provides FMS personnel with two basic functions - inventory control and depreciation calculation.

The primary role of the ORACLE System is inventory control. The system allows authorized users to add, change, retire, unretire and delete assets. It also provides an audit trail of FMS assets for accounting purposes. In FMS, it serves as the centralized computer inventory system which processes five major categories of data; additions, changes, retire, unretire and delete assets of the agency. Complete data archiving is available to track historic activity on the asset base.

The general requirements of this system are the ability to manage records, accommodate dates and data logic, implement standard data, and access information from its superseded repositories and databases (backward compatibility). The ORACLE system replaced the MACAMS system in October 2003. All MACAMS data was transferred to the ORACLE system.

ORACLE comes with a full suite of reports to extract information from the database.

The ORACLE Fixed Asset Module is used to:

- Maintain detailed property record for all FMS assets.
- Gather data entered by authorized users of the system for the purpose of updating the master file.
- Provide a clear audit trail of all agency assets during the life cycle of equipment at the agency.
- Perform certain edits to determine if the data is correctly entered.

- Maintain user levels defined to limit access to menu items and functions based on the user's job requirements. These access privileges are assigned in accordance with FMS security requirements.

A. Inputs: The following documents are used by authorized individuals to input data into the system:

- Packing Documents from Manufacturers sent with equipment.
- Purchase Orders to determine cost information.
- FMS-191 * FMS-191C "Property Transaction Forms."
- Surplus & Donation Documentation received from GSA.
- Property Disposal Documentation.

Disposition: Destroy when 3 years old or when audited, whichever is sooner.

B. Master File: Asset Management Data, Property Management Data, Custodian Account Numbers.

Disposition: Stored until Archived.

Destroy when 3 years old or when audited, whichever is sooner approved by .R. G. 1/26/05

C. Outputs: Documents generated from ORACLE:

- Custodian Property Listings
