Background Information **The Pilot Record Database (PRD) is a centralized electronic repository of pilot’s information that is accessible before allowing an individual to begin serving as a pilot for part 119 certificate holders, fractional ownership programs, and operators conducting air tour operations. Air carriers, specific operators holding out to the public, entities conducting public aircraft operations, air tour operators, fractional ownerships, and corporate flight departments are required to enter data such as airman’s employment, assignment to duty history, training and checking, drug and alcohol results, and disciplinary actions into the PRD. PRD improves aviation safety by automating Federal Aviation Administration (FAA) and Air Carrier to perform a standard check of a pilot’s entire comprehensive record and history, which is accessible by pilots as well as Air Carriers prior to making a hiring decision for employment.**
