FEDERAL AVIATION ADMINISTRATION FINANCIAL RECORDS DISPOSITION SCHEDULE

Attachment 1 to SF 115

1.0 INTRODUCTION

The purpose of this document is to describe the retention schedule and disposition for records involved in the Federal Aviation Administration's (FAA) financial management business processes. The scope of this records schedule provides retention policy to FAA financial records generated in the following business process areas:

- Financial Policy
- Budget
- Accounting
- Payments and Receivables
- Reimbursables
- Assets and Liabilities
- General Property Plant & Equipment
- Cost Accounting
- Financial Reporting
- Internal Controls

1.1 This schedule is an aggregate of the financial records maintained by FAA. This schedule is considered media neutral; however, the majority of the records are currently maintained in information systems. Appendix A identifies the current inventory of financial information systems that this records retention schedule applies.

The Office of Primary Responsibility for these records is the Office of Financial Services (ABA), Federal Aviation Administration (FAA). All other copies of records, regardless of format, maintained by other units are considered duplicate or non-record copies and shall be maintained no longer than the record copy.

This schedule consistently requests exceptions to the General Records Schedule (GRS) in order to facilitate the management and administration of electronic records in the appropriate information systems.

1.2 This records retention schedule is based on a flexible scheduling approach using the Federal Enterprise Architecture Business Reference Model (BRM) as the basis for aligning the core financial processes and their records. A "Big Bucket" approach is used to ensure that the implementation of the policy is viable for electronic records management and aligns with the retention of hard copy records for ease of retention schedule and records disposition.

1.3 Related financial records are defined as financial records that are duplicates or copy of financial records from source systems and unique records that are created by combining financial records with additional non-financial records that create unique records.

1.4 Electronic financial records that are maintained as part of mixed or non-financial systems shall be retained as specified by the schedule that describes the core or primary records. For example, if an information system is designed to provide investigative or safety information and financial records are tied to these primary purpose records (e.g., investigative or safety records), the financial records are retained according to the schedule of the primary purpose record.

1.5 Regardless of the retention period specified, records relating directly to an unsettled claim by or against the United States, current or pending litigation or investigation, and exceptions taken by the Government Accountability Office (GAO), will not be disposed of until final settlement or clearance of the matter.
