ITEM NO 8 DESCRIPTION OF ITEM AND PROPOSED DISPOSITION
1 Flight Safety Investigations LogBook (8000.14)

LogBook tracks the (1) investigations (aka Investigation log) and (2) certification activities (aka Certification Log) within the Office of Aviation Safety. It also provides office personnel with tools that assist reviewing and tracking activity. FAA gathers this information pursuant 14 CFR 91, 121, 135, 99, 145.

The system links to the local office database OASIS, which includes VIS and PTRS. Information that is updated in the OASIS program is automatically reflected in the various logbook reports. Data in these systems scheduled separately and is not part of this request for disposition.

### a. Master data file

This system is a collection of surveillance data, vital information of operators, agencies and airmen, and accountability of job tasks.

Disposition. **Temporal.** Cutoff at end of calendar year in which record created. Destroy 5 years after cutoff.

### b. Management and Activity Reports

A variety of management reports and a synthesis of an activity such as operator certifications (PTRS records, comments, notes, etc.). The information could be used as supporting documentation for legal enforcement actions.

Disposition. **Temporal.** Cutoff at end of calendar year in which record created. Destroy 5 years after cutoff.

### c. Snapshot data (local copy)

Additionally, LogBook creates a "snapshot" of the prior year information. This creates a local copy of the PTRS and VIS information so that the prior year logbook information is still available for viewing and running historical reports.

Disposition. **Temporal.** Cutoff at end of calendar year in which record created. Destroy 5 years after cutoff.
