ITEM NO 8. DESCRIPTION OF ITEM
(With Inclusive Dates or Retention Periods) 9. SAMPLE OR JOB NO 10. ACTION TAKEN

1. Acoustic and Audiometric Files. Records containing audiograms, charts, graphs, and tables showing an individual hearing threshold. Audiometric test files contain individual's name and job classification, date of audiogram, examiner's name, date of last acoustic or exhaustive calibration and employee's most recent noise exposure assessment. Correspondence and reports related to noise exposure measurements.

(a.) Noise exposure measurement files. Destroy after two years.

(b.) Audiometric test files. Destroy in agency after separation or transfer of affected employee's employment.

JUSTIFICATION: The Occupational Safety and Health Administration (OSHA) noise standard (29 CFR 1910.95) was amended to require every employer to establish and administer a continuing effective hearing program for all employee's whose 8-hour time-weighted average (TWA) noise exposure equal or exceed an "action-level" of 85 dBA.

We do not expect a large volume of these records, therefore we will maintain them on site. (See attached Order for further justification).
