Records Schedule Items

Sequence Number	
1	<p>I-35W Minneapolis Bridge Collapse and Replacement Bridge Records</p> <p>Disposition Authority Number DAA-0406-2011-0002-0002</p> <p>Dated August 2007 through September 2008. The I-35W Mississippi River bridge (officially known as Bridge 9340) was an eight-lane, steel truss arch bridge that carried Interstate 35W across the Mississippi River in Minneapolis, Minnesota, United States. During the evening rush hour on August 1, 2007, it suddenly collapsed, killing 13 people and injuring 145. The bridge was Minnesota's fifth busiest, carrying 140,000 vehicles daily. The National Transportation Safety Board (NTSB) cited a design flaw as the likely cause of the collapse, and asserted that additional weight on the bridge at the time of the collapse contributed to the catastrophic failure. Within a few days of the collapse, the Minnesota Department of Transportation planned a replacement bridge, the I-35W Saint Anthony Falls Bridge. Construction was completed rapidly, and it opened on September 18, 2008. Records consist of a wide variety of project design and construction files, plans, change orders and supplemental agreements, agreements of various kinds (utility, railroad, etc.), maintenance of traffic plans, Emergency Relief (ER) documents and sites associated with the collapse of the bridge, various project advertisement and bidding documents, environmental data and assessments and financial, planning and other engineering reports and data. Paper records approximately 15 cubic feet.</p> <p>Final Disposition Permanent</p> <p>Item Status Active</p> <p>Is this item media neutral? Yes</p> <p>Do any of the records covered by this item currently exist in electronic format(s) other than e-mail and word processing?
