	This schedule covers the Motor Fuels and Finance Analysis System (Fuels & FASH) in the Office of Highway Policy Information, Highway Funding and Motor Fuels Division, maintained in the Washington Headquarters Office of the Federal Highway Administration (FHWA). See attached.	New	

1.

Motor Fuels and Finance Analysis System (Fuels & FASH). The Office of Highway Policy Information, Highway Funding and Motor Fuels Division, provides motor fuel data monthly and highway finance information annually for the *Highway Statistics* publication (see item 2a above). The Fuels System receives, processes, and produces tables monthly and annually that are used for the *Highway Statistics* publication. In addition, the motor fuels data is used in the attribution and apportionment of funds to the States. The FASH System receives, processes, and produces receipt and expenditure tables for *Highway Statistics*. The office produces a variety of trend tables, motor fuel tax tables, pertinent tables for use by Congress, other Federal agencies, State and county governments, and individuals.

The Fuels & FASH application consists of software, documentation, help files, reports, and data. This application was originally two separate software packages, both implemented in mid-2002. The data ranges from 2002 to the present. The application does not directly support other applications. Data entry and validation functions allow State users to enter and verify their data. Analytical tools are provided to HPPI analysts to allow adjustments to balance the State-submitted data.

- a. **Inputs.** ~~Electronic data submissions by all State Departments of Transportation and State Departments of Revenue, including those in the District of Columbia and Puerto Rico, which are loaded into the system monthly and annually. Users enter the data into the application via direct user input (data entry) and file import (upload). Headquarters analysts in HPPI enter most of their data via data entry, although some file importing is required.~~

~~DISPOSITION: Destroy/delete after input and verification of data into master file or when no longer needed to support the reconstruction of master file, whichever is later.~~
