The Office of Chief Information Officer (OCIO)**

Name of Electronic System: Grants Tracking System (GTS)

Purpose of the System:

The Grants Tracking System is a Windows based database program developed by NHTSA to assist states in the financial management of Federal grants. The GTS is designed to automate financial progress with calculations that determine the total funds, Federal and State matching, which have been spent for all the National Highway Traffic Safety Administration (NHTSA) funding sources. It also produces Federal financial documents required at the program area level, and electronically transmits this information to NHTSA's accounting department (which includes the Regional and FHWA division offices and FAA Atlanta payment center). The entry of required State/local matching information into GTS is completed at the beginning of the Federal fiscal year and then rechecked at fiscal year closeout.

Note: Related records are disposed of in accordance with DOT Record Schedules and/or the appropriate NARA General Records Schedules.

- 1 **Inputs:** ~~Inputs consist of transaction information, such as the Advance of Funds~~
