ADRRES - Archival Declassification, Review and Redaction System

(See attachment )

PREVIOUS EDITION NOT USABLE
### ADRRES - Archival Declassification, Review and Redaction System

System used in implementing Executive orders to exempt Federal agency records that contain sensitive information, that would otherwise be released automatically per a predetermined schedule. The system documents decisions of agencies (equities) to release, exempt, or select a future date for declassification or re-review of particular documents. Enables NARA to notify agencies that a document will be released or selected for re-review. Also processes document reviews for release in response to FOIA requests.

<td>1</td>
<td><strong>Project/Case files.</strong>&lt;br&gt;Project/Case files are created for every declassification review project, Freedom of Information Act (FOIA) request (for classified and unclassified records), and Mandatory Review (MDR) requests for classified records. Project/Case files record, index and track documents withdrawn for agency review, monitor project status, review decisions made by external agencies, record external agency actions/suggestions (i.e., disposition decisions, suggested review by other agencies, and record sanitization information for exempt docs), and document declassification decisions made on documents in the project. Project/Case files can include scans of unredacted and redacted documents in the collection, and copies of any digital documents. <strong>Disposition:</strong> Delete project/case file when all associated records (holdings) have been released in full or when no longer needed for administrative responsibilities, whichever is later.</td>
<td></td>
