Records Created by Farm Credit System Banks and Associations Prior to 1957

During the seventeen year period from 1916 to 1933, Congress authorized and capitalized the component parts of the Farm Credit System -- the Federal Land Banks, Federal Land Bank Associations, Federal Intermediate Credit Banks, Production Credit Associations, and Banks for Cooperatives. Although these institutions were initially capitalized by the Federal Government, provisions were made for the capital eventually to be repaid. That process was completed by the Federal Land Banks in 1947 and by the other System institutions in 1968.

With repayment of Federal capital, Federal record-keeping requirements no longer applied to the Farm Credit System institutions. To define which records were Federal records and which were private sector records, the Farm Credit Administration issued Regulation 12 CFR 618.8390. This regulation essentially defined the "Federal records" of the institutions by date. Records in existence before January 1, 1957 were Federal records; those created after that date were not. Requests for disposals of Federal records held by the financial institutions are submitted to NARA by the Farm Credit Administration which then notifies the financial institution of the action taken.

The records retention periods indicated below apply only to the pre-1957 Federal records held by financial institutions of the Farm Credit System. No Federal records are currently created by these institutions. (NOTE: If the institutions hold Federal records that are covered by the General Records Schedules, the records will be disposed of in accordance with those Schedules.)
