	<p>RECORDS OF THE OLD BUREAU OF VALUATION STORED IN THE WNRC AND RELATED FINDING AIDS THAT LACK SUFFICIENT VALUE TO WARRANT PRESERVATION IN THE NATIONAL ARCHIVES</p> <p>The Bureau of Valuations was the unit of the Interstate Commerce Commission directly responsible for the valuation of railroads and pipelines. Most of the records of the Bureau pertain to the valuation of railroads. The railroad valuation records consist largely of microdata about individual railroads that has sufficient value to justify their preservation in the National Archives. Such permanently valuable records are scheduled by Job No. N1-134-90-1.</p> <p>This job covers a small amount of microdata about railroads that lacks such value, records pertaining to the tallying of data about railroads, the cost of railroad products, the valuation of pipelines, cost studies done for other federal agencies, and correspondence of the Bureau of Valuation. The segregation of the WNRC records of the old Bureau of Valuation into a job covering permanent records and a job covering disposable records allows the immediate accessioning into the National Archives of the valuation records having enduring value.</p>
