Valuation Maps Updates
WNRC Accession: 62-735  Total Volume: 924 cubic feet (N1-134-83-1/IC2a)
This series contain detailed land maps submitted by railroads subsequent to varying dates of basic valuation. These records consist of right-of-way map, station, and detached land maps, showing data as to boundaries, detached land, and in some instances, cost of acquisition, grantor and grantee.

Permanent. Transfer immediately upon approval of this schedule.

Justification:
This series was appraised as temporary by N1-134-83-1/IC2a. This series is an update to the basic valuation maps (permanent records via N1-134-83-1, item IA2c). These records document later appraisals that determined the value per acre or per square foot of land falling within specified land zones. Almost all of the land zones were established during the basic valuation period and the records relating to appraisal of land in those zones during the basic valuation period. There is some duplication between the two series but there is also unique information. There are notations locating land covered by transaction in the post valuation period and Richard Smith, NWCS has determined that this additional unique information contains sufficient historical documentation to warrant permanent retention.
