7. ITEM NO.	8. DESCRIPTION OF ITEM <i>(With Inclusive Dates or Retention Periods)</i>	9. GRS OR SUPERSEDED JOB CITATION	10. ACTION TAKEN <i>(NARS USE ONLY)</i>
	<p><u>DEFERRAL DISPOSITION RECORDS</u> - Hartsville Nuclear Plant; Phipps Bend Nuclear Plant; Yellow Creek Nuclear Plant</p> <p>These records consist of information related to the total design process of nuclear plants whose completion was deferred and ultimately cancelled. There are 1075 cubic feet of records dating from 1972 to 1984, consisting of incomplete design information, marked up 1/2-size TVA and vendor prints, drafts, incomplete or previously microfilmed calculations, printouts used for scheduling and tracking purposes, vendor correspondence, deferral disposition packages and other documents already included in TVA records systems.</p> <p>Documentation associated with the design and construction of these nuclear plants became associated with different functions upon the plant's deferral and cancellation (See the attached cancellation decision documents. The documentation was to facilitate possible restart options and to support investment recovery efforts.</p> <p>These records were not:</p> <ul style="list-style-type: none"> o used to make the decision to cancel the nuclear unit(s); o used to document the decision making process;

	<p>o associated with materials and equipment transferred to another plant unless they duplicate transferred records, or</p> <p>o associated with materials sold or offered for sale in in a safety-related function unless they duplicate transferred records.</p> <p>These records will not provide traceability required for potential NRC or buyer notification under 10 CFR21. Similarly, records in this series exclude those needed to establish the status of contracted work for either legal or financial purposes.</p> <p>The nuclear plants originated most of the records. Vendors, requisitioning organizations, and construction originated the remainder. At deferral, all of the documentation became the responsibility of the Deferral Nuclear Units Project (BNP) and then the Investment Recovery Project (IRP).</p> <p>The deferral documentation includes working files, drawing prints, and deferral disposition packages. In the case of all three types of documents, any record material was preserved through appropriate documentation systems so that these deferral files do not consist of any record materials.</p> <p>DISPOSITION:</p> <p>Destroy when plant is cancelled and documentation is no longer required for investment recovery, typically not to exceed one year after cancellation of plant.</p>
