1	Fossil & Hydro Power, Heavy Equipment Contract Files. (See Attached)		

1. HEAVY EQUIPMENT CONTRACT FILES

This file of purchase documents provides Central and field offices with information as to sources of supply, previous prices, descriptions and specifications of needed parts, materials, supplies, and services relating to the operation and maintenance of TVA Fossil & Hydro Power heavy equipment. The record copy of purchase documents are maintained in Finance & Administration and, Purchasing organizations. These files contain background operational information which is not located in the original contract file. Because of operational and maintenance needs, these records must be maintained for as long as the equipment is in operation which may be as long as 20 to 30 years. The inclusive dates of these records are 1934 and continuing. The contracts are filed by contract number and the year of purchase. Up until 1980, the files were only in hard copy form. Since 1980, contract information has been generated from various electronic data bases which are used for procurement and supply management for TVA. These systems are MAMS, Walker System and ITMS (covered by GRS 20, item 3). Contract information is retrieved from these systems by contract number, TVA tag number and classification code.

DISPOSITION

Destroy 5 years after equipment is retired or sold.
