   See the attached description of this item.
ELIMINATED LAND TRACT RECORDS

Realty Administration acquires land and land rights for TVA programs and projects. Land tract files are set up for each land ownership affected by the project at the time the preliminary title work is prepared (Land Tract Files scheduled by N1-142-90-19, NCI-142-84-7, and GRS 4, Item 4). Sometimes tracts appearing to be a part of a new TVA project and some entire projected projects are not needed. For example, (1) after a survey has been completed, an entire project may be cancelled; or (2) a decision may be made to relocate portions of a new transmission line and this would cause some tracts to not be needed. This series contains the records associated with these tracts which are identified as eliminated or "not acquired" tracts on project maps. Eliminated tract files could contain title work, appraisal work, and/or unexecuted option contracts.

The inclusive dates are 1933 and continuing. The volume is approximately 15 cubic feet and the estimated annual growth is less than .5 cubic feet.

DISPOSITION

Destroy upon completion of acquisition of involved project or upon determining that the project is not needed and the land not purchased.
