1	See the attached schedule for the MATERIAL SAFETY DATA SHEETS (MSDS)		

9/27/1999 cbc copies to: agency, NWME, NR, NRC

MATERIAL SAFETY DATA SHEETS (MSDS)

Material Safety Data Sheets, required since 1983, are prepared and distributed to users of hazardous materials by the manufacturers of those materials. TVA maintains approximately 45,000 of these sheets, and approximately 20 are created by TVA. They are the primary source of information on hazardous materials. They must be readily accessible during each work shift while employees are in their work area. They include chemical characteristics, physical hazards, health hazards, special protection, spill or leak procedures and special precautions for handling as well as cleanup and fire instructions. The owner of MSDS is Occupational Health and Safety (OH&S).

The 29 CFR 1910.1020 requires employers to maintain records of employee exposure for 30 years. However since these records will be used to account for long latency periods between exposures and manifestation of diseases such as cancer it is recommended that they be maintained for 75 years. Since TVA does not measure employee exposures, the Access rule has identified MSDS to be considered substitutes for exposure records because they document that the chemical was present in the workplace.

~~An index of the MSDS is maintained on a CICS data base. The MSDS are being scanned and will be maintained electronically. Plans are to have them available for viewing throughout TVA.~~

A. MSDS created by TVA and created by manufacturers of hazardous materials that are maintained by OH&S (or successor organization)

1. Hard copy

Destroy when imaged and verified.

2. Imaged version

Destroy 75 years from date of MSDS unless earlier destruction is authorized by OSHA regulations

3. Electronic mail and word processing versions

Delete when recordkeeping copy has been produced *or when no longer needed* ~~unless needed longer~~ for revision or dissemination, *whichever is later,*

(TO BE APPROVED BY NARA)

B. All other copies

Destroy when no longer needed

(Nonrecord)
