

# INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

## **Schedule Number: N1-142-99-015**

All items in this schedule are inactive. Items are either obsolete or have been superseded by newer NARA approved records schedules.

### Description:

Records are assumed to have been destroyed at the agency inasmuch as they were not mentioned in the N1-142-10-001 bucket schedule crosswalk. See also N1-142-00-004.

Date Reported: 07/28/2022

*cc: Agency, NP, NRC*

## TVA YEAR 2000 APPLICATION COMPLIANCE VALIDATION RECORDS

These records are validation documents to provide TVA's Year 2000 (Y2K) Project Office (managers, staff, and team) with a consistent means of tracking all application and/or system hardware/software in reference to TVA Year 2000 Compliance. The Application Compliance Validation records will provide the following:

Documentation of the compliance work performed to meet the requirement of TVA's Year 2000 Application Standards for developed, purchased, or a combination of purchased and developed software (s).

Document the concurrence on application date compliance status by responsible parties (application custodians and application owners).

Supporting details of how application date compliance was achieved (result of business prioritization, testing, vendor version/release requirements, computer environments, etc.).

Upon receipt of the completed validation document, the Y2K Project Applications Project Leader will document the application as TVA Year 2000 Compliant, including the assignment of the TVA Year 2000 Compliant Status Code (compliant, renovated, vendor-fixed, retired, or replaced).

This same validation document can be used to track compliance of non-application items such as systems software, hardware, and facility equipment. These records will be scanned and stored in the TVA electronic vault.

This series includes form TVA 11603, TVA ADP Hardware Inventory Sheet, and the form PC Hardware Not Y2K Compliant, which are used to document compliance or noncompliance for PC hardware, servers, and their peripherals.

### DISPOSITION

#### A. Record

Destroy or delete when superseded or obsolete, or upon authorized deletion of the related master file or data base, or upon the destruction of the output of the system if the output is needed to protect legal rights, whichever is latest.

#### B. Electronic copies created on electronic mail and word processing systems

Delete after recordkeeping copy has been produced unless needed longer for revision or dissemination.
