# NOTICE - SOME ITEMS SUPERSEDED OR OBSOLETE

## Schedule Number: NC-142-75-004

Some items in this schedule are either obsolete or have been superseded by new NARA approved records schedules. This information is accurate as of: 07/28/2022

#### **ACTIVE ITEMS**

These items, unless subsequently superseded, may be used by the agency to disposition records. It is the responsibility of the user to verify the items are still active.

Item B remains active

### SUPERSEDED AND OBSOLETE ITEMS

The remaining items on this schedule may no longer be used to disposition records. They are superseded, obsolete, filing instructions, non-records, or were lined off and not approved at the time of scheduling. References to more recent schedules are provided below as a courtesy. Some items listed here may have been previously annotated on the schedule itself.

Item A was superseded by NC1-142-85-12 item 2411

| 1.                      | Engineering Project Histories   | x  |                     |
|                         | This group of records contains engineering information<br>related to the planning, design, and construction of all<br>TVA power plants and projects. Included in these records<br>are documents from 1904 that are non-TVA but contain<br>valuable research information related to the development<br>of the power projects and related activities. The TVA-<br>produced documents from 1904 to present contain maps,<br>black and white, and color photographs that are needed<br>for special references and environmental research used in<br>planning future projects. This group of records documents<br>the growth of the major electrical power entity in the<br>world as related to engineering progress in this field<br>and is invaluable for research. There is only the origi-<br>nal copy of these records and they should be microfilmed<br>for security purposes to facilitate reference requests<br>and to save on floor space. Because of special needs<br>that only the original hard copy of the record can ful-<br>fill, it will be impossible to destroy the hard copy.<br>Therefore, we suggest that after the Engineering Case<br>History file has been microfilmed that the hard copy and<br>one duplicate be transferred to the Federal Records<br>Center at Eastpoint. |  |                     |
