C. DATE  D. SIGNATURE OF AGENCY REPRESENTATIVE  E. TITLE
   5-17-76  Ronald E. Brewer  Assistant TVA Archivist

7. ITEM NO.

8. DESCRIPTION OF ITEM
   (With Inclusive Dates or Retention Periods)
   Concrete Schedules

   These records include 60, 90, and 120-day forecasts and correspondence and are transmitted between the Division of Engineering Design design project managers and the Division of Construction project managers. They are generated on most of TVA's construction projects. Upon receipt of these records, Division of Engineering Design initiates an internal review of the forecast, schedule, and/or tabulations to determine which drawings must be issued before concrete pours can be made. The tabulations are updated and the information is then transmitted to the Division of Construction.

   After a new forecast or schedule has been made and the concrete has been poured, these records are of no significant value in the Division of Engineering Design. We recommend that a short retention period of 6 months be approved for these records.
