1 Control Laboratory Analytical Records

These records are generated by the laboratory which is a part of the Division of Chemical Operations. The records are comprised of a monthly average report which is made up of air and aqueous waste watersheets, analytical worksheets and a samples register.

The Samples Register is used to register, describe, and sequentially number laboratory samples as they are received for testing in the laboratory.

The worksheets (analytical, air and aqueous waste) are used to record raw data regarding repetitive analysis. The raw data is reviewed and then summarized into a monthly report which is used for efficient plant operations and quality production control.

In order to comply with the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 ET Seq; The Act) we are requesting that the air and aqueous waste worksheets be retained for 3 FY. (The other worksheets can be destroyed in 12 calendar months. The Samples Register is used primarily to locate samples related to the general laboratory worksheets and is of no further value once the worksheets are destroyed. The Monthly Average Report, which contains
