7. ITEM NO.
   Woodland Resource Analysis Program

8. DESCRIPTION OF ITEM
   Woodland Resource Analysis Program (WRAP) is a personalized woodland management plan offered to the small, non-industrial woodland owner. Records include a computer generated report which is distributed to the landowner and his forester; and computer input forms which contain information about the landowner, his ownership goals, an inventory of his timber stands, economic information such as stumpage prices and costs associated with woodland management.

   The input forms (list attached) are microfiched when the plan is completed for each landowner.

   A. Input Forms + related correspondence from individual forester -- Disposition:
     1) Paper - Destroy upon verification of microfiche
     2) Microfiche - Destroy when 25 years old. Do not transfer to Federal Records Center

   B. Woodland management plan for individual landowner - computer-generated report which includes all the input information
