   Division of Water Resources

4. NAME OF PERSON WITH WHOM TO CONFER
   Ronald E. Brewer

5. TEL. EXT.
   FTS 854-3351

6. CERTIFICATE OF AGENCY REPRESENTATIVE:
   I hereby certify that I am authorized to act for this agency in matters pertaining to the disposal of the agency's records; that the records proposed for disposal in this Request of 2 page(s) are not now needed for the business of this agency or will not be needed after the retention periods specified.

   [ ] A Request for immediate disposal.
   [x] B Request for disposal after a specified period of time or request for permanent retention.

7. DATE
   10-29-79

8. DESCRIPTION OF ITEM
   (With Inclusive Dates or Retention Periods)

   RESERVOIR AND STREAM SURVEY DATA

   The stream and reservoir survey data are obtained by actual field collection operations on streams and reservoirs in the Valley area using standard survey techniques, such as: electrofishing, hoop netting, rotenone, gill netting, and impingement. Larval sampling data are also compiled on these data sheets. This information on population count, species, etc., is needed to support branch fisheries management programs and establish the structure and quantity of the fish community at existing and prospective power development sites on Valley reservoirs--past, present, and potential sites. These data also support reservoir management problems that occur at power plants.

   The original data sheets are created in the Eastern and Western Area field units of the branch and are maintained in the office of the Biological Interpretation Group, Fisheries and Aquatic Ecology Branch. The original data sheets will be destroyed when the accuracy of the microform is verified.
Reservoir and Stream Survey Data - continued

The records for 1936 through 1978 will be on 16mm microfilm. Beginning January 1979 the records will be on microfiche. The original microfilm and microfiche will be filed in the office of the Biological Interpretation Group, Fisheries and Aquatic Ecology Branch, Norris, Tennessee. Copies of the microfilm and microfiche will be available in the area offices of the Fisheries and Aquatic Ecology Branch, Norris, Tennessee, and Muscle Shoals, Alabama, for daily reference and work needs.

The Agency certifies that filming will be done in accordance with 41 CFR 11.50.

Disposition:

a. Original copy: Retain until microform is verified.

b. Duplicate copy: Destroy in Agency when no longer needed for administrative purposes; not exceed one year.

c. Microform: Life of reservoir.
