9. TITLE
Assistant TVA Archivist

10. STANDARD FORM
115-107

1 ITEM NO
Work Order and Project Final Cost Report Files

8. DESCRIPTION OF ITEM
(With Inclusive Dates or Retention Periods)

These files contain cost analysis, reconciliation, and final cost reports on all additions to and retirement of TVA plant, except Chemical (See attached list of forms). They are working papers used to convert cost and descriptive data into unit record form and plant accounts. They serve as a historical reference in linking plant units with the original costs. After a location is retired, the value of its files is lessened. FERC requires retention for "10 years after clearance to plant account provided continuing plant inventory records are maintained; otherwise, 6 years after plant is retired." Continuing changes in plant, however, make it desirable that all records be retained for 6 fiscal years after the plant location is retired, except that records for locations sold as operating units or systems should be retained for 25 fiscal years. Past experience has shown that such records are sometimes needed for unitization because the plant is reacquired.

A. Records for operating units or systems retired through sales: Transfer to Federal Records Center upon sale of facility. Destroy 25 years later.

B. Records for all other operating units or systems: Transfer to Federal Records Center upon retirement of plant. Destroy 6 years later.
