10-16-80	<i>[Signature]</i>	Assistant TVA Archivist

7. ITEM NO.	8. DESCRIPTION OF ITEM (With Inclusive Dates or Retention Periods)	9. SAMPLE OR JOB NO.	10. ACTION TAKEN
	<p><u>Farm Surveys in Vicinity of TVA Nuclear Plants and Proposed Nuclear Plant Sites</u></p> <p>This data is collected and used by TVA in the process of evaluating nuclear plant sites or proposed sites for environmental impact considerations related to agriculture. TVA must assure itself, other agencies, and the public that nuclear plants do not produce an undue hazard to any person. Further, it must describe in detail impacts on the environment before a nuclear plant can be constructed. These requirements originate from the TVA Act, the National Environmental Policy Act, and the Nuclear Regulatory Commission. The survey forms used have been approved by the Office of Management and Budget, the approval number is OMB 74R0090. The information collected is covered by the Privacy Act of 1974.</p> <p>Farmer data is needed so that more precise measure of radiological dose computation can be determined, therefore, a 100-percent survey of farm households and commercial dairies within a 5-mile radius of a plant or proposed site is conducted. Specific types of information gathered are names, ages, addresses, and number of years living on the farm; whether owner or operator; farm location and size; crop and yield grown on openland; marketing data for crops;</p>		<i>[item]</i>

7. ITEM NO	8. DESCRIPTION OF ITEM (With Inclusive Dates or Retention Periods)	9. SAMPLE OR JOB NO	10. ACTION TAKEN
	<p>livestock inventory; milk products, including amount produced, grade, amount consumed, and name of consumer; and use of tobacco by household members.</p> <p>This data is summarized and sent to TVA's Radiological Hygiene Branch for their use in carrying out weekly monitoring activities. It is used by OACD to describe agriculture in a given area in preparation of NRC Licensing Compliance Reports which include Environmental Assessment Reports and Safety Analysis Reports and in responding to questions raised by interveners and the Nuclear Regulatory Commission.</p> <p>Accumulation is 10 cubic feet since 1974. These records are filed by project.</p> <p>Disposition: Destroy ^{in agency} when 40 years old (unless review at that time suggests longer period.)</p> <p>Note:</p> <p>A definite retention period is not stated now due to the short time elapsed since TVA began the nuclear power generation program and it is impossible to determine future needs for this information. However, another review will be made in five to ten years to determine if one can be established.</p>
